

General Security Guidance for Controlled Drug Suppliers

Listed below are the main security measures appropriate for premises from which controlled drug (CD) supplies are made.

This list is neither exhaustive nor prescriptive. It is for licensees to determine how their premises and stocks within them are to be secured.

Factors such as the nature of the location, extent of CD stocks and manning levels will be relevant.

It is recommended that advice be sought from the local police Crime Prevention Office (or equivalent).

Also attached is a list of safe and strongroom suppliers.

Security measures recommended for full-line wholesale premises

- Perimeter fence & gates where appropriate
- Perimeter surveillance – detector-activated CCTV (monitored)
- External doors to recommended standard (LPS 1175 SR4)
- Intruder alarm system conforming to ACPO 2000 requirements
- CD store to appropriate standard e.g. Demountable Strong Rooms
- SOPs to cover procedural security - keys, access control, staff recruitment

Additional measures recommended for large manufacturing sites

- 24/7 guarding
- Electronic access control system with audit trail

Recommended requirements for short-line wholesalers (not Schedule 2)

- Moderate security measures consistent with total stock values
- Intruder alarm system conforming to ACPO 2000 requirements
- CD store/safe/cabinet (where required) to appropriate standard
- Protect/secure/control lower schedule CD stock
- SOPs to cover procedural security - keys, access control, staff training
